NORMAN H. BANGERTER, GOVERNOR

JOHN T. NIELSEN, COMMISSIONER
D. DOUGLAS BODRERO, DEPUTY COMMISSIONER

STATE OF UTAH
DEPARTMENT OF PUBLIC SAFETY

MARCH 1988

For 10 years now, the Department of Public Safety, Bureau of Criminal Identification has been an active participant in the FBI Uniform Crime Reporting Program. The Uniform Crime Report (UCR) is utilized by numerous societal entities for various purposes. From educational institutions to the media, and from law enforcement to all criminal justice agencies, the UCR is the most reliable source of data used to provide a "barometer" of the criminal activity in the State of Utah.

What makes the report unique is the compilation of the crime statistics at the local level. Each law enforcement agency in the state provides, on a monthly basis, statistical reports which make up the foundation of this yearly report. As always, the Department of Public Safety, as well as all users of this report, express appreciation to those who work diligently in providing the statistical data. It takes a great deal of time, effort, and dedication to put this report together. It is our sincere hope it can be utilized for the public good and for exploring ways to diminish the criminal activity within the state of Utah.

John T. Nielsen
Commissioner

1987 SUMMARY ANALYSIS

- There were 94176 Crime Index Offenses reported during 1987, a 2.8% increase over 1986.
- The highest increase in reported crime was murder with an 8% increase followed by burglary 4.2% increase, and Larcery theft 4% increase.
- Rape showed a decrease of 12.3% along with assault down 10.6% and robbery down 9.2%. Motor vehicle theft was down 6% and arson was down 5.3%.
- 91,486 arrests were made in the state which is a 7.8% decrease over 1986, of these 35% involved juveniles.
- The value of property stolen amounted to $44,776,304. 29% was recovered.
- The theft of motor vehicles accounted for a substantial value of property loss, amounting to $11,482,018. Value of motor vehicles recovered was 7,740,683.
- Residential burglaries accounted for 66% of all burglaries reported. 34% of these were committed at night.

ACKNOWLEDGEMENTS

The Departmental Staff extends its appreciation to all law enforcement agencies of Utah who contributed to the Uniform Crime Reporting program. Their consistant, accurate reports are the basis of this document.

Special appreciation is extended to the Federal Bureau of Investigation Uniform Crime Reporting Section for the assistance provided to the Utah UCR program.

INTRODUCTION

This report represents the tenth consecutive year the Uniform Crime Report has been compiled and published in the State of Utah. To put these reports together requires an extraordinary effort on the part of many criminal justice practitioners.

It is important to keep this report in perspective. It does not represent the overall crime rate in Utah. The report reflects the F.B.I.'s Crime Index of murder, forcible rape, robbery, aggravated assault, motor vehicle theft, burglary, arson, and larceny theft and gives us a basic knowledge of the numbers of crimes occurring in these categories.

The overall crime increase or decrease in these respective categories is derived by dividing the number of offenses that occurred this year into the number of offenses that occurred last year. This method of figuring percentages presents two significant distortions. First, most offenses occur in the larceny-theft category which, when combined with the total offenses committed, skews the overall picture. Second, the rate of theft seems to rise a certain percentage each year, which does cause the overall percentage to rise although you will see a significant drop in several of the more serious offenses categories. Therefore, when the report is analyzed, it may be well to study each category of offense individually and make judgement's on it's own merits.

Utah has one of the lowest homicide rates per capita of any state in the country. If murder increases or decreases by one or two per year, the percentage of increase or decrease is much more dramatic and this should be taken into consideration when you see an 8% murder increase during this previous year.

CRIME FACTORS

In order to provide a meaningful statistical profile of crime within the State of Utah, each law enforcement agency must provide the Uniform Crime Reporting Unit with data that depicts specific crimes that are occurring within their jurisdiction. There is a need for compatibility with the National Uniform Crime Reporting System and, therefore, categories of offense classifications used within the state are identical with those of the National System. This results in equitable conclusions being drawn from the data submitted.

Reported Part I offenses and arrests are recorded in the municipality where they occurred regardless of the outside investigative agency which may investigate, arrest, or otherwise dispose of the case.

The factors which influence crime rates are dependent upon characteristics of the community. When attempting to interpret the crime statistics presented herein, one should be aware of the social structure and factors that lead to or cause criminal behavior.

Crime rates in this publication are based on the stable population of the municipality. Fluctuating seasonal population figures are too inaccurate to be used as a measurement for determining crime rates. Municipalities with high seasonal populations may indicate a higher crime rate per one thousand than may be normal for a municipality their size. This would also be indicated in municipalities that experience high population increases due to special events or commuters.

Set forth below are some of the factors which, by type and volume, will affect the crime that occurs from place to place:

- Density and size of the community population and the metropolitan areas of which it is a part.
- Composition of the population with reference particularly to age, sex, and race.
- Economic status, including job availability and mores of the population.
- Relative stability of population, including commuter, seasonal, and other transient types.
- Climate, including seasonal weather conditions.
- Cultural conditions such as educational, recreational, and religious characteristics.
- Effective strength of law enforcement agencies.
- Administrative and investigative emphasis of law enforcement.
- Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional and probational.)
- Crime reporting practices of the general citizenry.
- Attitudes of the public toward crime reporting.
- The administrative and investigative efficiency of the local law enforcement agency, including degree of adherence to crime reporting standards.
- Cooperation of adjoining and overlapping police agencies.

OFFENSE DEFINITIONS

Criminal Homicide:

a. Murder and Non-negligent Manslaughter:
The willful, non-negligent killing of one person by another. Excludes attempts or assaults to kill (classified as aggravated assault), suicide, and accidental deaths. The killing of a felon by a private citizen or the killing of a felon by a police officer in the line of duty are considered justifiable homicides by UCR and are excluded from this count.

b. Negligent Manslaughter:
The killing of another person through gross negilgence. Traffic fatalities are not counted.

Rape:
The carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category.

Robbery:
The taking or attempting to take anything of value from the care, custody, or control of a person by force or threat of force and/or by putting the victim in fear.

Aggravated Assault:
The unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed. Attacks using personal weapons (part of the attacker's body) must result in serious personal injury to be classified as aggravated assault. Simple assaults are excluded from this count.

Burglary:
The unlawful entry of a "structure" to commit a felony or theft. The use of force to gain entry is not required to classify the crime as burglary. Burglary is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

A "structure" is considered to include the following, but not limited to: dwelling houses, apartments, out buildings, public buildings, offices, factories, barns, cabins, etc.

Larceny:
The unlawful taking or stealing of property or articles without the use of force, violence, or fraud. This includes crimes such as shoplifting, purse snatching, pocket picking, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. This crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is excluded from this category inasmuch as it is separate Part 1 offense.

Motor Vehicle Theft:
The unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

UCR defines a motor vehicle as a self-propelled vehicle that runs on the ground and not on rails. Examples include automobiles, trucks, buses, motorcycles, mopeds, snowmobiles, etc. Thefts of farm and/or construction equipment, boats, and airplanes are not included in this category but are counted as larcenies.

Arson:
The willful or malicious burning of property with or without the intent to defraud. Includes attempts.

CRIME RATES FOR INDEX OFFENSES

The Uniform Crime Reporting Program provides data for police executives to measure local problems. To facilitate this function, the local data must be converted to terms of rates and percentages.

CRIME RATES

One of the most meaningful crime statistics is the crime rate. This rate is the number of Part 1 offenses per 1,000 inhabitants. This rate can be calculated regardless of the number of inhabitants in any city, town, or county.

In computing crime rates by county, population estimates for individual counties were prepared using current census reports.

No attempt has been made to incorporate either transient population or other factors which contribute to the ratio and type of crime in a given area. Any effort to make comparisons of crime rates between one area and another should recognize these population changes and varying environmental factors.

Ten Year Trend

THE UTAH UNIFORM CRIME REPORTING PROGRAM TENTH YEAR OF OPERATION

In 1978 Utah joined a growing number of states that have adopted Uniform Crime Report as the official statewide Crime Report. The Department of Public Safety has accepted the responsibility to collect, validate and tabulate Uniform Crime Reports from all reporting jurisdictions in Utah.

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics for use in law enforcement, administration, operation, and management. This compiled data is also intended for the use of other professionals and scholars who have an interest in the crime problem, at the same time this information is important as a reference source for the public as an indication of the crime factor in our society.
